

Home Renovator/Builder Comparison Chart

After all of your interviews with various contractors, it can become a daunting task to select the best one in which you can place your confidence. There are so many variables to take into account: *credentials, quality of work, service, cost, communication, track record in the industry, level of expertise and knowledge etc...* all of these factors, and many more, need to be considered for you to achieve the result you deserve.

Below is a comparison chart to assist you in selecting a Professional Home Builder/Renovator.

Do not be fooled by companies who merely sell a good story. For your own peace of mind, check them off against the list below and ask yourself if you are ready to trust that company with your hard-earned money, not to mention one of your biggest investments – your home. For example, a company that insists upon a 50% deposit could be waving a large red flag - a credible long-term business would never do this. Instead, they will typically require 10% upon signing and then bill in appropriate stages after the project is in progress. Please protect yourself and never hesitate to ask questions. Feel free to use the following chart when comparing your potential renovation companies – the final choice will become apparent quickly.

	Ultimate Homes & Renovations	Contractor B	Contractor C
